INTRODUCTION

INCREASE YOUR WEALTH

Your investment in terms of money can be made to grow. Most types of investments, such as stocks, certificates of deposit, or bonds, and even KENZO - TOKEN aiming to offer a long-term return on your investment. This return allows your money to grow and build wealth over time.

This is our mission and the goals we have for our investors.

ACHIEVE HIGHER RETURNS

To increase your wealth financially, your money should be invested in a project with a high potential of getting a reward. The higher the return, the more money you will make. Investing in crypto tends to offer the opportunity to earn higher returns than savings accounts.

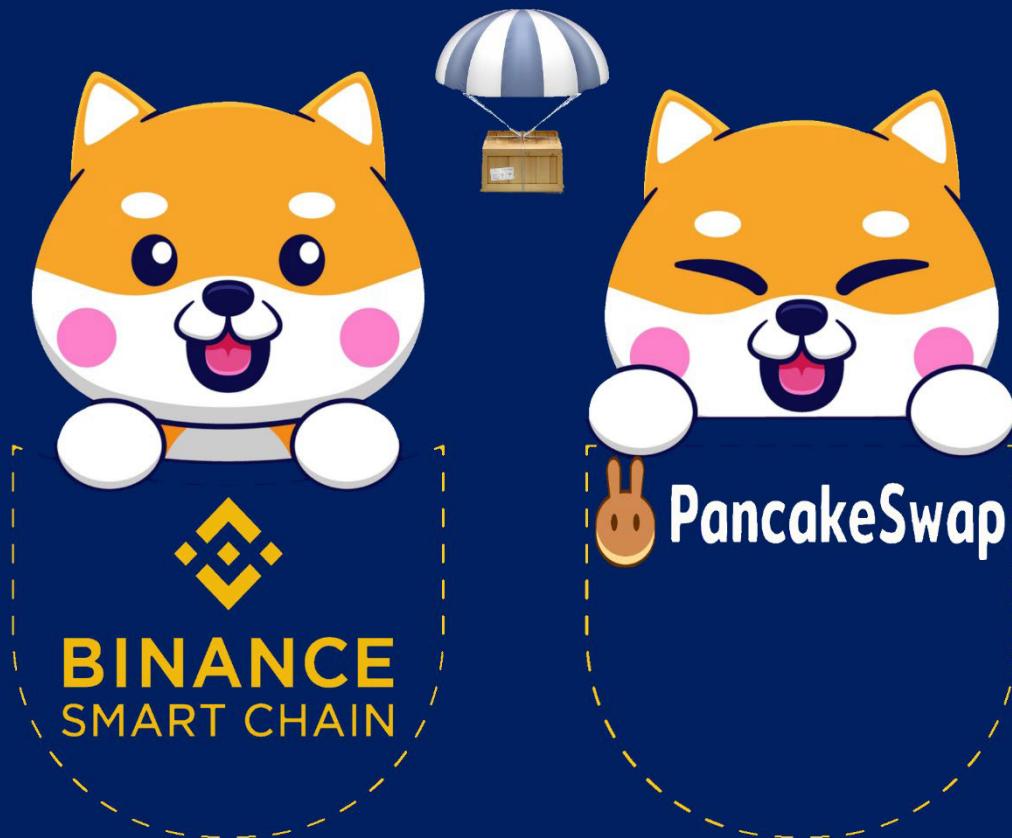

Therefore, if you desire the chance to earn a higher return on your investment, then Shiba Kenzo's mission is just that, to achieve higher returns for our investors.

BE PART OF A NEW GENERATION PROJECT (Shiba Kenzo)

A new project like ours needs financial backup, and we look to investors for these finances. That is why we agreed to spend over 5% on marketing and 10% on product development, we have seen other projects "COLLAPSE" due to lack of marketing budget and lack of interest in developing their product for investors and expand their roadmap. Be part of the Shiba Kenzo's team and community.

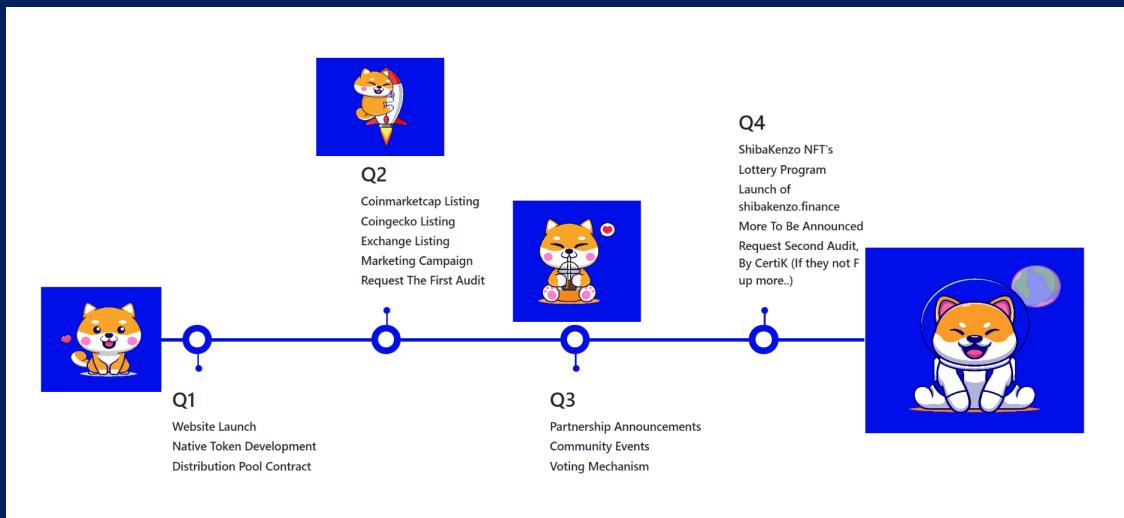

SHIBA KENZO's AIRDROP's

The Shiba Kenzo (KENZO) will AIRDROPS from time to time to give back to our investors.

However, there are some ground rules that must be followed to be eligible for this.

ROADMAP

LAUNCH OF SHIBAKENZO.FINANCE

WHAT IS YIELD FARMING?

At its core, yield farming is a process that allows cryptocurrency holders to secure their holdings, which in turn earns them rewards. More specifically, it is a process that allows you to earn either fixed or floating interest by investing crypto in a DeFi market.

Simply put, yield farming involves lending cryptocurrency through the BSC-network. When loans are made through banks with fiat money, the amount lent is paid back with interest. With Yield Farming, the concept is the same: cryptocurrency that would otherwise be on an exchange or in a wallet is lent out via DeFi protocols (or in Ethereum terms, locked into smart contracts) to earn a return.

SHIBA KENZO's Yield farming is done with BEP-20 tokens on the Binance Smart Chain (BSC) with rewards being a form of KENZO- token.

How does Yield Farming work?

The first step in Yield Farming involves adding funds to a liquidity pool, which are essentially smart contracts that hold funds. These pools run a marketplace where users can trade, borrow, or lend tokens. Once you have added your funds to a pool, you have officially become a KENZO liquidity provider.

In exchange for locking your finds into the pool, you will be rewarded with fees generated by the underlying Defi (KENZO TOKENS)

WHY INVEST IN SHIBA KENZO?

Our team works from Berlin, London, Stockholm, and Oslo. We combine a deep understanding of the crypto market.

We also combine four core values that unites the SHIBA KENZO team.

We dare to be different

We are daring in our thinking and challenge the status quo. We value debate and appreciate complementary perspectives as we seek creative solutions to complex problems.

We are committed to what we do

We are genuinely committed and passionately curious, entrepreneurial in spirit and action - the best idea wins.

We get things ready

We intently work to shorten decision paths and prioritize to ensure that everything we set out to do gets done well, rather than too many things at once.

We respect people and all animals

We act with solidarity and seek to build trust in all relationships. We demonstrate responsibility and strive to be on the right side of history, helping to move our industry toward more sustainable, long-term thinking. Therefore, we have decided to donate money to World Wildlife Fund, Inc.
